WORLDWIDE TV-FM DX ASSOCIATION

SERVING THE VHF-UHF DX ENTHUSIAST

THE VHF-UHF DIGEST IS THE OFFICIAL PUBLICATION OF THE WORLDWIDE TV-FM DX ASSOCIATION, DEDICATED TO THE OBSERVATION AND STUDY OF THE PROPAGATION OF LONG DISTANCE TELEVISION AND FM BROADCAST SIGNALS AT VHF AND UHF. W.T.F.D.A. IS GOVERNED BY A BOARD OF DIRECTORS: TOM BRYANT, GREG CONIGLIO, BRUCE HALL, DAVE JANOWIAK, AND BILL THOMPSON.

EDITOR/PUBLISHER : BILL THOMPSON COMPTROLLER: DAVE JANOWIAK

NORDQUIST, MATT SITTEL, DOUG SMITH, STEPHEN WEST, THOMAS J. YINGLING, JR.
LAYOUT: BILL THOMPSON. COVER DESIGN BY: HARRY HAYES.

FROM THE STAFF:

RESULTS OF BALOTTING: 24 valid ballots were returned with 19 favoring the Estes Park, CO bid tendered by Jim Thomas and 5 favoring the North Georgia location submitted by John Broomall. Thanks to Jim and John for their willingness to host our annual event. A large percentage of the ballots came from members in the west and midwest. There was a respectable representation from the southeast, and a poor showing from the northeast. More detailed information will be published as convention time approaches. For the present, mark your calendars and make plans to be in Estes Park August 9-11.

CHANGES AHEAD: Editor/publisher Bill Thompson has been carrying more than his share of the WTFDA workload for a long time; and the Board of Directors is finalizing plans to re-distribute many of those responsibilities. Matt Sittel, "MAILBAG" editor, has agreed to assume the task of handling all club mail at a new address in Asheville, NC. This will include keeping the membership list current, forwarding inquiries to appropriate addresses, and sending dues payments to Dave Janowiak. The Buffalo post office box will remain active for an indefinite period of time, but will likely be phased out at some point. Full details will be announced in the next month or two. An offshoot of this will be the availability of a list of all club members by city and geographical designation. As additional personal information is cleared for release by each member, updates will include postal and e-mail addresses, fax numbers, web sites, and other pertinent data.

STUDENT MEMBERSHIP RATE: A majority of board members have approved the establishment of a special rate for WTFDA members who are bona fide students. Details will likely be published next month in this column.

WTEDA WEB PAGE: There's a lot of interest in this club project, and several members have offered to assist in preparation and maintenance of the web site. David Austin, who already has a dx-related site, is coordinating our efforts, and will be cooperating with an ANARC team involved in a similar project. See Ernie Wesolowski's "***ANARC NEWS***" elsewhere in this issue for more information.

WTFDA Mailbox *February 1996*

February, 1996 Renewals Due:

Marty Barvinchak, James A. Brown, Jr., John D. Buehler, Dan Cashin, Steven Cornell, Dan Dankert, Bill Dulmage, A. Hatfield, Harry J. Hayes, William R. Hepburn, J.B. Hiett, William Higgs, Malcolm P. Hunt, Clay Jackson, Frank Luman, Victor McCoy, Frank Merrill, Russell Miller, Joe Perge, Alain Petri, Kurt Richardson, Dave Roberts, D. Reuben Saltzer, John Zeis.

New on the 'Net:

Bill Nienajadly, Clifton NJ	103357.2563@Compuserve.com
Joe Perge, Newark OH	jperge@infonet.com
Jim Richardson, Estes Park CO	jimfun@aol.com

Greg Coniglio also wrote to say that the entry in the December 1995 VUD, page 6, WTFDA Internet List for John Jefferson should read John Johnson. If you have joined the Internet, drop me a line and I'll be happy to include your address above. And YES, you sure can submit Mailbox items via e-mail! In fact that's the easiest way for me! Don't forget if you've moved recently to share your new address with us. And if you just joined the VUD, welcome! Let us hear from you!

* John Adams, Seaside OR

I have a few comments to make to those "format malcontents":

1. IF YOU DON'T LIKE WHAT YOU HEAR, TURN THE DIAL!!! If you're forced to listen to a station you don't like at work, complain to your co-workers, or boss, or union, or find another job.
2. I doubt any radio station is going to change its format, or presentational techniques, or musical selections, or shut down entirely just because a faction of DXers decides they don't like it and state so over and over again in the VUD.
3. If the way some stations are programmed bothers you so much, maybe you should just get the heck out of the hobby. QUIT TORTURING YOURSELF! Or maybe you should start your own station (legally or otherwise), program it the way you want, and compete in the free market place.
4. At the risk of sounding like I'm advocating "free speech for me, but not for thee", or "political correctness", or whatever, I would like to urge Messrs. Coniglio and Buntin, and other editors, to edit out such comments from their respective columns... I should note that the level of mean-spiritedness in the VUD I've been discussing has dropped quite a lot... Let's hope this trend continues. (At least members aren't belly-aching about home shopping networks like they were a few years ago.)

* Note: The content of this letter was edited. To all contributors: please remember that unkind remarks aimed directly towards another WTFDA member will NOT be published in this forum.

* Jim Dietrich, 1642 N. Baltimore Ave., Derby KS 67037

I'd like to report some relevant DX hardware news from the recent Microwave Update '95 conference held October 26-29 in Arlington, Texas. As part of the proceedings, on-site noise figure measurements were performed on approximately seventy-five low-noise receiving preamplifiers for

various microwave bands in order to make a direct comparison of noise performance. The competition was fierce, with many amps measuring less than 1dB. However, at the conclusion, the best reading was by an RDX Labs unit having recorded a 0.25 dB NF in the 900 MHz band located just above the UHF TV band.

The results of these independent, head-to-head measurements indicate the level of performance available to DXers with the RDX Labs amplifiers. For more information on them, watch upcoming VUDs for the newest product listing or drop me a SASE.

* Doug Smith, 1385 Old Clarksville Pike, Pleasant View TN 37146-8098

Wow. Looks like Mailbox is off to a great start. Apathy may be rampant in society in general, but not in the WTFDA! Members not active on the Internet may not realize how much work our more active members have put into the club in 1995. Our Board of Directors (Tom Bryant, Greg Coniglio, Bruce Hall, Dave Janowiak, Bill Thompson) has been especially active & busy. Of course, my fellow column editors have also put a lot of work into keeping the VUD interesting and the club active. On the Internet side, Kurt Richardson, Saul Chernos, and Greg Coniglio deserve special mention for keeping everyone up to date on the latest openings and happenings. I'm also seeing a much-improved effort at landing new members.

Unfortunately, "translator abuse" has hit Nashville with a vengeance. The last week of December 1995 was a bad one... On Christmas Day, during the big skip opening, I stumbled across a big signal on 88.5, normally a relatively open channel here. Figured it was Texas - but on the hour, the ID was for WNKJ and its two brand new translators, W203AM Dickson (which is what I was listening to) and W266AB Providence, Kentucky. One of my best DX channels bites the dust... Five days later, I'm driving to Gallatin (another Nashville suburb) and listening to my favorite stations, WYYB-93.7/WRLG-94.1 (they simulcast). Pulling into town, I notice severe adjacent-channel interference & figure it must be skip. I tune to 93.9 - no, it isn't skip - WNAZ-89.1 has a translator in West Gallatin! If I were a modern rock fan in Sumner County, I'd either be bitching up a storm at the FCC or punching a hole in 93.9's coax! Seriously, WNAZ and WAYM-88.7 have translators in every town of consequence in central Tennessee. It's hit the point where they're not only making DXing difficult, but wiping out reception of stations non-DXers would otherwise want to listen to.

TV is doing a tad better - I've only gained two new locals in 1995. WJFB-66 returning to the air in October, first with the Weather Channel, later with Z-Music - the former informative, the latter at least watchable. Then, in mid-November WNAB-58 came on as a WB affiliate. This station is worth watching, they have some decent syndicated programming.

CONGRATULATIONS!

...to WTFDA member Robert Kramer, who married Renee Elizabeth Runkle on November 11, 1995. On behalf of the WTFDA, we wish you a lifetime of happiness together!

Don't forget to share weddings, engagements, births, and other happy news with the WTFDA family! Also, please send any obituaries to Mailbox as well.

That's all for this month. Thanks to all the contributors this time!

73s Matt

ANARC NEWS...

The Association of North American Radio Clubs

from your WTFDA
ANARC representative
Ernest J. Wesolowski

Let me take a moment to introduce myself. I have been in the WFTFDA since 1993, and active in several radio clubs for many years. During the 1995 convention in Lake Placid, I was appointed to represent this club, filling the position held for quite some time by Stephen Sprachman who had resigned earlier in the year.

ANARC is comprised of 18 clubs, most of which are focused on medium wave and shortwave interests. A complete list of all ANARC member clubs is available for a SASE to ANARC, 2216 Burkey Drive, Wyomissing, PA 19610.

ANARC's goals are to promote the activity of dxing; and to support and assist in the organization and maintenance of dx clubs in general. Other stated purposes are to represent the interests of member dxers and dx clubs to equipment manufacturers, the government, the press, and the public at large. ANARC also strives to foster a sense of community among its' member clubs as well as to advance the relationship between dxers and those who transmit the signals.

The organization is governed by a three member Executive Board, with each member serving a two year term. There is also a treasurer and legal counsel.

Representatives of the clubs affiliated with ANARC conduct an annual award presentation to recognize dxers who have made significant contributions to their respective clubs and the dxing hobby in general.

A high priority on the ANARC agenda is establishment of a home page on the World Wide Web. This web site will contain information about the 18 participating clubs. Once the system is up and running, links will switch (or refer) visitors to home pages for member clubs, as well as personal pages and related areas of interest in the Internet realm. The WFTFDA has evolved as a leader in this project, and is currently in the process of setting up a club page specifically designed for TV and FM dxers. Several WFTFDA members have indicated an interest in contributing to the club's web site which is being developed by David Austin.

I will submit updates on ANARC activities as information becomes available. If you have any questions or suggestions, please write me at 13312 Westwood Lane, Omaha, NE 68144-3543.

TIP DEADLINE - The 10th

Many of the items listed in this column are taken from the publication:
M Street Journal - P.O. Box 2108- New York, NY 10159
PHONE (212) 473-4668, FAX (212) 473-4626

KEY:
& satellite programming
AF: new freq. allocation accepted for filing
for a new FM license
CC: call change/new calls assigned
CL: city of license change granted
CO: new xmtor co-ordinates
CX: a CP has expired, and is cancelled
C1,C2, etc: change in class status
DA: directional antenna
DE: calls deleted, license returned to FCC
FC: station formal change

GA: granted amendment to table of FM allocations
GE: station was granted extension of a CP
GX: granted replacement of expired CP
LC: filed for license to cover (for new stn.)
MC: multiple-city legal ID
NC: no change yet, on a reported pending grant/change.
ND: non-directional
NO: station is not on the air
NS: a new station granted a license
OSA: one-step application
NW: new station signs on the air
PA: proposed amendment to change table of allocations
PC>: a power change (increase)

PC<: a power change (decrease)
PG>: power change granted (increase)
PG<: power change granted (decrease)
QC: frequency change for this station
QG: frequency change granted
RA: station returns to the air
RE: station requests extension of a CP
RX: station requests re-instatement of an expired CP
SG: slogan change or update
SI: station is silent
XA: dismissed amendment to the table of FM allocations
XC: station changes xmtor site
XG: station granted a transmitter (xmtor) site change

WUTR-20 Utica	A	AU

WWTI-50 Watertown	AF	AFU
WLYH-15 Lebanon	C	U
WLTX-19 Columbia SC	C	CU
WYHB-39 Chattanooga	-	W
WTVZ-33 Norfolk	F	?
WVBT-43 Virginia Beach	W	F

With the large number of stations affiliated with more than one network, I'm finding it necessary to abbreviate networks. Here's the list:

A	ABC	T	TBN
C	CBS	U	UPN
F	Fox	X	CTV
N	NBC	Y	CBC
P	PBS	Z	SRC
W	WB		

I suspect much of this month's information is old news, but maybe well worth repeating...

WYHB-39 is a LPTV.

Gala is the Galavision Spanish-language network; KSTV has gone English.

The WNAL change undoes a previous change. WJSU-40, not WNAL-44, will become the ABC affiliate for Birmingham. In Atlanta, WATC-57 isn't yet on the air but is expected on in early 1996.

CALL CHANGES

Station	Now
K65BP	Santa Barbara KWHY-LP
WVEU-69	Atlanta WUPA-69
W56CC	Florence, SC WEYB-LP

KWHY-LP relays KWHY-22 Los Angeles. WEYB-LP is a Fox affiliate.

OTHER STUFF

This is certainly the smallest TV News in at least two years... for good reason. The FCC has been open for one day since I wrote the January column. (and consulting engineers who work with the Commission say many employees took accumulated vacation on that one day..) The FCC hasn't released any technical changes since last month. In Canada, the CRTC has been much more active, but FM and satellite activities have occupied most of their attention.

While it isn't totally final, it looks like Congress and President Clinton have agreed on most of a new telecommunications bill. The major parts of this bill would allow cable-TV companies to provide local telephone service, and local tele-

phone companies to offer cable TV. But relaxation of multiple-ownership regulations for broadcasters is another major part of the bill.

As it stands, one firm can own up to 12 stations, or stations reaching 25% of all households, whichever comes first. No two stations may be owned in the same city.

Under the new law, the 12-station limit would be repealed entirely, and the 25% figure changed to 35%. The FCC would be required to consider relaxing or repealing the one-station-to-a-city regulation.

Theoretically, it's contrary to FCC regulations for one firm to own radio and TV stations in the same city. However, the Commission frequently waives this regulation. The communications bill would relax these restrictions in the 50 biggest markets. And, a rule prohibiting one firm from operating two TV networks would be relaxed. One network could build a second network, but would not be allowed to buy an existing one. Remember that the legal definition of a "network" is very different from the common definition. Right now, ABC, CBS, and NBC are the only three "networks".

Action on the bill is expected by early February.

FORUM

John Broomall, Atlanta GA:

By the time you read this, John expects new WATC-57 to be on the air. WATC is to be an independent religious station. It'll be the only full-power station broadcasting from Sweat Mtn. near Roswell, with 1700kW. There are three LPTVs here, W20AU (dark), W55BM (TBN // WHSG-63), and W67CI. (Telemundo)

WATC is a non-commercial station, one of a handful of such stations that aren't PBS-affiliated. I know of three other religious non-PBS non-commercial stations (KRMT-41 Denver, KLUJ-44 Harlingen, Texas, and KETH-14 Houston), and two secular stations. (KBDI-12 Broomfield, Colorado and KMTB-32 San Francisco)

John presents a rare chance to make some money by DXing! WATC is offering a chance for a prize to anyone outside Georgia who submits

a valid reception report in the station's first 57 days on the air. Send your reports to:

John Broomall
799 Santa Fe Trail
Woodstock, GA 30189

Only one report per household, please.

John is behind the WVEU=>WUPA report. He says the station plans to move its transmitter to One Peachtree Center, and increase power.

Bud Paxson is creating a duopoly in the Atlanta area. He's purchased WNGM-34 Athens, which will be paired with his WTLK-14 Rome. One station will carry his IN infomercial network, while the other will be WorshipNet religious. Which will do which hasn't yet been decided. The future fate of WTLK translator W34AG Rome is unknown, but their W66BA Dalton has already gone permanently dark.

In nearby South Carolina, WGGS-16 has installed a "20 watt LPTV STL" at Epworth, SC to relay their signal to W36BM Augusta, GA. John says these STLs are separately licensed and are secondary to any broadcaster. (including LPTVs)

The Epworth STL operates on channel 62. This is not to be confused with full-license (but low-power) WASV-TV 62 Asheville, NC which also relays WGGS. John asks, "Has anyone logged a UHF STL link?" Good question. I know now-dark W05BD Madison had one on channel 65, but despite many attempts I never saw it.

Greg Coniglio, Williamsville NY:

A network change is pending in the Buffalo area. An item in the Buffalo News indicates a move to establish a WB affiliate in that market. Religious station WNYB-49 and dark WTJA-26 Jamestown have requested FCC approval to swap transmitters. Channel 49 would become a WB affiliate, while 26 would return to the air as a religious station.

The paper quoted current WNYB General Manager as saying he didn't know how wide an area channel 26 is capable of serving. Greg's response: "He is in for an unpleasant surprise!"

WTJA is currently authorized for 661kW at 180m HAAT. That's a bunch more than a "four-letter

(Forum, Greg Coniglio, contd.)
LPTV", but it sure isn't a power-house. I asked Greg whether CBLFT-25 would be a problem. He confirms the Canadian SRC station is essentially a local in Buffalo and will cause lots of problems for WTJA..

Jeff Kitzko, Latrobe PA:

Jeff provided many of the network changes this month. He's also found a few interesting tidbits on the WorldWideWeb.. In Phoenix, it's now been a year since the Fox Surprise turned that city on its ear. The ratings are in, and it doesn't look good for Fox. The rankings:

1. KPNX-12 NBC=>NBC
2. KTVK-3 ABC=>ind.
3. KSAZ-10 CBS=>Fox
4. KNXV-15 Fox=>ABC
5. KPHO-5 ind=>CBS

As a result of these numbers, KSAZ replaced its general manager. To be honest, I sure wouldn't complain about any of these numbers - and if I was in charge at KTVK, I'd be handing out some raises!

Jeff suggests a cool WWW site for TV DXers:
<http://tvnet.com/TV/localtv.html>
I've tried this one too; it's well worth a look!

John Lentz, Muskego WI:

John has two quick notes from Milwaukee. WCGV-24 was off for almost a week, from January 8 through the 12th. Transmission line problems were blamed. Unfortunately, no tropo was noted during WCGV's absence.

On channel 18, WVTV has returned to 24-hour broadcasting. No programs are aired between 2 and 6am, but ID color bars are aired.

Bill Nienajadly, Clifton NJ:

(welcome to the Net, Bill!) Bill corrects my listing of "WNYX-38". The channel 38 station is W38CH, Amityville, L.I.. WNYX-LP is channel 39 and broadcasts from Long Island City. The two stations do simulcast.

Dennis Park Smith, Santa Barbara CA:

Dennis is looking for back issues of the VUD, as well as old bulletins of the CDXC and AIPA. If you've got any you're interested in getting rid of, let me know & I'll get you in touch with Dennis.

On a different subject, during a road trip just before Christmas, Dennis saw a bunch of relogs, and one new station. K28EM Mariposa is now on with TBN.

Regarding ham-TV, Dennis noted WTV editor Victor Frank's logging of WB7UGZ Winton, California. Dennis had seen WB7UGZ while in Turlock, and assumed the WB7 station was coming through the W6CX translator on Mt. Diablo.' (Dennis had previously verified a legal ID on W6CX)

At the time, Dennis hadn't checked a map for the location of Winton; it's closer to Turlock than he thought. On hindsight, he believes he was seeing WB7UGZ direct, and he's now considering sending a report.

I'd suggest WTFDxA members send reports to any ham-TV stations they log. Most such stations are truly experimental, and I think they'd be truly delighted to receive reports, especially from people who aren't hams! If you get a callsign ID but need an address, write me - I have a CD with ham addresses. Or, on the Internet, connect to www.ualr.edu; the University of Arkansas runs a search engine for ham's mailing addresses.

Russell Miller, Houlton ME:

Russ has a mystery. By meteor scatter, he's been seeing a station with "CICA" in the sync bar - on channel 4. The Database only lists one CICA relay on channel 4, at Rainy River, Ontario - and it's only 10 watts! My best guess is Russ is seeing TVOntario programs on a U.S. station - probably WUNC-4 Chapel Hill, NC. I know my local WDCN-9 airs a number of TWO programs - it's not unusual to turn on channel 8 and see a full-screen map of Ontario!

DX ETC.

The winter skip hit full-force on Christmas Day here, with four straight days of skip and some openings running well into the early hours of the morning. But nothing since December 29. The colder-than-normal weather has also squelched tropo around here. Here's hoping things improve in February!

EDITED FOR THE 'VHF/UHF DIGEST' BY TOM BRYANT,
849 TODD PREIS DR., NASHVILLE, TENNESSEE, 37221

This column departs from the usual historic photos and stories for a bi-directional perspective of our hobby, and some of the peripheral happenings that influence it. We'll be travelling backward and forward in time.

CHANGE: a dxer's challenge!

As hobbies go, dxing is a relative newcomer. 100 years ago, no one was doing what we take for granted today.

Shortly after the turn of the century sparkgap transmissions, then Morse code, human voices, and even music were being heard by dxers 'round the world.

VHF TV and FM dxing was likely pursued for the first time about 50 years ago.

Since then, more facets have evolved, UHF being the most prominent among them.

Over the years dxers have adapted to sample the wonders of each new mode of transmission.

Early on, the spectrum was uncrowded and new catches were frequent. More recently the proliferation of stations has not only multiplied the number of possible catches, but made them more difficult at the same time.

The future of dxing as we know it is uncertain. The prospect of digital audio and high definition television casts a shadow of uncertainty.

As if that weren't enough, there is another force at work right now. It spans the globe and enters your home through a phone line...and connects you to the world with amazing speed.

The Internet/World Wide Web might be considered by some as an enemy in the dx camp. It does not demand the

same skills that we have honed, nor does it offer the same sorts of challenges.

It is another evolution in communication; and while it cannot and will not take the place of over-the-air dxing, it has already established itself as a useful dxing tool.

During Es and Tr events, computer bulletin boards are loaded with almost instant detail of reception reports and conditions.

Those of us who are 'online' wonder why everyone isn't; and those who aren't tend to resist the whole idea.

The long and short of all this is simply that failure to adapt to any new technology is likely to leave one stranded in the past.

Computers and all the avenues they can open are NOT mandatory dx tools; but it's obvious that without them there is a rapidly widening information gap that nothing else will fill.

If, for some reason, you are among those conjuring up reasons NOT to take the plunge; particularly if you are overwhelmed (perhaps terrified) by the complexity of it all, take it from a total computer idiot (me), that it's never too late to learn...and in the process add a host of valuable new resources to your dxing arsenal.

Black and white circular test patterns and ftps CAN find happiness together!

PHOTO-NEWS

PUBLISHER'S NOTES:

SORRY!...I'd like to apologize for the lateness of the January VUD, which had to be sent out more than a week after the usual 5th of the month mailing--just in time to sit through a Monday postal holiday. As many VUD readers have assumed, winter weather played a big part in all this. Things are pretty much back on track now, so you should be reading this issue about 2 to 3 weeks after receiving January's. Believe it or not, Buffalo weather was actually not quite as bad as most of the rest of the Northeast, having already gotten a record amount of snow weeks before the "Big One" that socked in the Eastern Seaboard. Word is circulating about DXers who have suffered antenna damage, lost AC power, or even got flooded out in a very unseasonable post-Blizzard of '96 thaw. Okay, I managed to get the starter fixed on my car...now, does anyone know how to thaw out an antenna rotator without having to climb the tower in a minus-20 Fahrenheit wind chill?

THANKS...to *FMedia* maven Bruce Elving for November's VUD cover; to Jim Thomas of Old West Graphics, WTFDA's 1996 Convention host, for his December cover "TOON;" to FM NEWS and NFM editor Greg Coniglio for the January '96 cover logo collage, and to *Broadcasting & Cable* cartoonist Jack Schmidt (via Tom Bryant) for providing material used on this month's cover.

February 1996

Deadline: 5th

Excellent skip conditions were noted on December 26th! Many members logged new stations, including double hop at over 2100 miles! Russell Miller received Texas on Ch. 4! Tropo was rare during the period.

Due to time restraints I will have to step down from this column in the near future. This is a great opportunity for a member with a computer to take over the column, but not a requirement. Send a letter of qualifications to HQ. In the meantime, continue sending your reports to the VA Beach address.

Comments: December 26 was one of my best skip days ever! Saw some old loggings and got a few more new ones. I was able to "upgrade" my equipment (relatively speaking) with the purchase of a Sharp BW set for \$10 from a thrift store -- very well kept set, probably in someone's dorm years ago and they just got tired of it. I have revised my method of logging the time -- all times now appear as my local time (Eastern) as it allows me to keep the days straight and it relates better to program times than UTC.

I have set up my own World Wide Web (WWW) pages on the Internet. You can access any of these pages from the address above. I'm maintaining a running TV DX log and you'll be able to see my TV Guide collection as well. I have over 60 editions from the US and Canada as well as TVG-equivalents from England, Germany, Denmark, Poland, Quebec and the French West Indies. All trades reciprocated with the latest Washington-Baltimore TVG. DX and QSL tip: you can use the WWW to access TV stations' home pages and thereby ID logos, station personalities, etc. A good point of departure is TVNet at <http://www.tvnet.com>. Also, Matt Sittel referred me to a distance calculator at <http://www.indo.com/cgi-bin/suid/~bali/dist>. And a big "thank you" to all those who helped me ID tentatives from my last report!

Comments: The November 27th tropo was strong, with a tentative logging of WJEB-59 FL but it may have been Goldsboro, NC since both are TBN with a zero offset. I also had CH. 51- and CH. 52+ with the same religious program. WNVT-53 Goldvein, VA was in but not DC. In the begining of December there was skip at 0030 that looked like Cuba but I thought they signed off around 12am. The TN LPTV received in my last report is apparently from Greenville, NC on Ch. 54.

Propagation during November/December 1995

The end of 1995 off-Es season (in the Northern Hemisphere) was productive for a number of our reporters. Was it the holidays, or nature, that caused a repeat of November 24-26th openings on December 25-28? (A solar rotation is only 27-28 days.)

Fernanado Garcia also reports a super tropo opening November 26-27, when he received UHF stations as far away as GA, SC, NC and VA.

Frank Aden, Jr., N7SOK, 4096 Marcia Place, Boise, ID 83704.

Equipment:

TVs: 27 inch Magnavox Color Monitor, 19 inch JC Penney (RCA) Color set, 13 inch BMG color monitor. VCRs: Radio Shack #45 MTS stereo, JC Penney (RCA) Mono, Hitachi VM-39A Camcorder, Antenna: Radio Shack Ch. 6 to 13, 14 erl. on rotor at 22 ft. Winegard 2- dB preamp, HI-Q filter for ch. 6.

Santa gave us a great "gift" for Christmas, one of the strongest winter Es openings in years. MUF was up to ch. 6, but I did not note any FM DX. The Es returned on both the 26th and 27th.

December 1995 PST

25 Saw indications that this may have started before (my cordless phone was acting up) 11:00 A.M., but was not actually able to check it out until 1 P.M. The local ham club had reports of major six meter activity. I have got to get a 6-meter rig some day!

25 1300 KENW 3 NM
KTXTt 5 TX (Never saw an ID)
???? 2 CBS station mixing
under local KBCI
1700 KSWK 3 OK mixing with KENW
KFUX 3 TX "

Opening died about 7 P.M., did not appear to move around much. Very intense CCI on ch. 3 at times. Ten meters was open to Northern CA, CO, and SE USA.

26 Checked 10 m at the TV for skip at 6 P.M., nothing, but about 7 P.M. Es appeared. Very intense on ch. 3. Lasted to about 8 P.M.

26 1930 XHPN 3 COAH
2000 KENW 3 NM

27 Short opening started at about 11 P.M. until 11:20 P.M.

27 2300 KENWt 3

31 2:30 A.M., ch. 4, MS, unID station with ch. 4 logo, star in middle of the 4, suspect TX, but could be any one SE of me. Any ideas?

Jeff Kruszka, 5024 S. Braxton, Baton Rouge, LA 70817

Note 1: New LPTV, somewhere in a 50 mile radius, with VCC home shopping. Not K13VE or K13VG.

I might have missed the 12/14 tropo opening had the unID 59 with color bars not caught my eye before work. I ended up taking off a half day of work, and managed to get a new tropo state!

KERA and WFAA were both logged with the 8-bay UHF antenna. (I didn't know I could do this!) I always used the rabbit ears for all VHF loggings in the past, but with my antenna now in the attic, VHF enhancement seems to have been improved. Some nice Es openings Christmas week, as I had the whole week off (though not many IDs).

Western TV DX

William Draeb, 1304 Ellis St., Kewaunee, WI 54216-1802

Here's a report to end this year. Not much tropo activity seen, unfortunately, due to the rotten weather patterns moving through here. Some Es this month. Was about the only good thing that happened since September.

In a narrow corridor between the hurricane and an advancing front, Opal produced two stations on October 5.

On November 19, tropo was in until 1400 with many unIDs. Tropo was believed to extend to Birmingham at over 600 mi.

I was surprised to see the Cuban Phillips at 2255 and for an hour. This Christmas night opening produced two NC ch. 2s and a Cuba ch. 2, but no sign of any Florida ch. 2s. I have never observed this before. The ionosphere was strange, with very rapid fading. I briefly saw Spanish programming override Cuba 2. It was either the other Cuban 2 or 2E. Cuban TV is in the 1350-1600 mi range.

The amazing super tropo opening of Nov. 26-27 will go into my records as my best tropo days ever. Some Florida LPTVs were coming in with stereo (\$) and near-snow-free pictures. Signals were strong even during the noon hour when I received W35AJ next to my local ch. 34. Florida is now my second most received state with over 100 logged TV stations.

With this opening into GA-SC-NC and VA, I extended a lot of my previous distance records (of Florida stations).

Signal strengths were astounding, all stations were with color picture. I got WRAZ -50 snow free and W38BB with stable color picture both at 1450 miles.

I take a lot of pictures. I'll send them to Jeff Kruszka soon.

Danny Oglethorpe, P.O. Box 6688, Shreveport, LA 71136-6688

Equipment:

J.C. Penney (RCA) 19" TV; Zenith System 3 19" TV; Winegard PR-5040 VHF log at 18' AGL, Tandy RG-6QS, Channel Master 9510A rotor.

Distance: per Fred Nordquist's printout

Not much DX going on this time around. Some good skip the last week in December, but not much tropes has been reported. I hope the guide at the end of this column helps if you are unsure about the meaning of some symbols in this column. Thanks to all who participated in the WTFDA survey, and many thanks to Matt Sittel for putting together a GREAT survey! If you have received some DX lately, let's hear from you! ...

Trops this year came in August/September rather than October. As a matter of fact, October was very poor month for tropes up here in the Northland. Prosit this year produced 131 new stations from 29 states and one province in Canada. Not too bad a year!!! On Dec. 16 while at the cabin in Prosit has Es in Spanish on ch2, 3-510pm, a strong signal at times. "El Canal De Los Estrellas" noted with "Navidad" in lower right, SE towards Florida or Cuba. Several ads in Spanish for McDonalds, Old El Paso sauce, and women's undergarments. This past month have done extensive research in my log book for Bloomington to ensure the totals to be submitted to Fred Nordquist are as accurate as possible. Rather hard going through 43 years of stuff, but I guess it was all worth the effort. There will be some changes in the Es, MS, & Au totals. After all these years, CA finally received! Another fact uncovered is that, living in MN, I have logged 219 MN stations. TX is second with 189! A difference of only 30 stations! The Es on 12/26 was very erratic and came from all over. Many others were heard but had a quick fade out. Regards & Good DXing. John Ebeling.

Nice to have this surprise skip! The opening on the 26th was better than the 25th, in terms of MUF, and strength. There was some TV skip to the Maritimes on the 27th, but I did not note anything on FM. No other DX at all to speak of recently. No trops at all, with the very wintry weather pattern. 93 inches of snow already as of Jan. 11th, including 38" on one day in December! Also many cold days, only getting into the teens (normal high is 30), so not very conducive to trops!

A GUIDE TO NORTHERN FM DX

JOE Q. DXER - 1988 ANTENNA WAY - HILLTOP, NEW YORK 14444

Equipment: McIntosh MR78 tuner, Stereo Probe 9 antenna at 40 ft. above ground, 150 khz filters, phase-box into ~~TV VHF antenna~~, and a whole lot of wires.

 very strong!, NEW STATE, #30

logging time (24 hours)

calls, frequency, state, city of license

- * Underlined calls: a new logging (new frequency counts, but not a call change)
- * Dashed underlined calls indicates you have heard the station before, but with a different propagation mode.
- * Small "t" after the calls indicate this is a tentative reception only.
- * Calls in brackets indicate first time hearing this station with new call letters (indicate the last calls you heard this station with)

COMMON ABBREVIATIONS**PROPAGATION MODES**

ES - E-skip

TR - Tropospheric ducting

TrS - Tropo-scatter

MS - Meteor Scatter

AU - Auroral reflection

GW - Groundwave/local reception

OTHER

\$ - Stereo

& - satellite programming

wx - weather

nx - news

ex: - station previously heard as

MUF - maximum useable frequency (for skip)

QTH - DXers location

QRM - interference

REPORTING TO NORTHERN FM DX

I encourage as many people as possible to report. If you have gotten some DX, we are all very interested in reading about it! Check the masthead of this column and Southern FM DX to make sure which column you are to report to. Also keep a close eye on reporting deadlines, and cutoff dates. Reporting DX frequently enough to avoid the cutoff date makes the information in the VUD that much more timely! I will make exceptions for a few loggings that extend back past the cutoff (like a half dozen or so), but not a huge report going back a year!

Format: If you can't have it typed or done on computer, that is no problem. If your handwriting is legible, there really isn't much difference, as long as I can read it! Try to keep it as close to the format you see in the VUD, if possible.

REPORTING TO NFMDX VIA INTERNET!

I certainly encourage this if you are able, and want to! You can delay sending the report until closer to the deadline, save a stamp, and it is easier to compose on my end! One month this summer, nine reports in NFMDX were sent via Internet! Some tips to make your report easier to put together here ...

* Use tabs to separate elements, not spaces. Spaces may look better on the screen, but they may not line up right when the report is printed. Ex: 1900 <tab>WEDG<tab>103.3<tab>NY<tab>Buffalo, comments<tab>125 If you can't do tabs, use a consistent spacing, like 4 spaces or something, so I can use the "global replace" on Microsoft Word. Generally, try to keep the report looking as close to the VUD as possible, so less shifting around is necessary.

A BIG THANK YOU to all of you who have reported to this column! You have made doing this column fun! Hope that this has helped make reporting easier - let's hear from you!!

SOUTHERN FM DX

FEBRUARY 1996

Danny Buntin
1312 N. Skyline
Stillwater, OK 74075

DEADLINE: 14th

SOUTHERN FM D is for reporters from: AL, AR, AZ, CA, CO, DE, DC, FL, GA, HI, KS, KY, LA, MD, MO, MS, NC, NM, NV, OK, SC, TN, TX, UT, & WV. HAPPY NEW YEAR, 1996!

No SFM column for January due to no reports received. However this month several reports highlight the off season Es activity that happened around Dec. 26-27. Elsewhere Pat Dyer updates his prodigious DX activity for 1995.

On Dec. 26, I decided to return my obviously defective fall tropo season to the DX store & exchange it for a winter skip season that might fit me better. They did an excellent job, HI! Seriously, there'd be a lot more DX in this report if I didn't have to go to work - had to leave in the middle of openings on both the 26th and 27th. Unfortunately, things stopped after the 28th. With the unusually cold fall and winter, there's been almost zero tropo - just some enhancements to Memphis. TV was open for at least 10 hours each on Christmas and the 26th.

This is the AVIS TRAVELERS NETWORK, handled by Capital Broadcasting Systems, Inc. (515 Madison Avenue, NY, NY 10022) Suite 1111. 20 minute loop tape narrated by George Plimpton carries "sports trivia, updates on today's hottest money matters, the latest took reviews and more. Also carries commercials! ATT / Hilton-AVIS/ Planet Hollywood restaurants plus local commercials. Have sent a report asking for list of the AVIS Net. stations. Tape presentation very well done! Avis Concierge Service Phone #1-300-941-AVIS. (Thanks to tip from Gus Mancuso in WFDA bulletin pg. 39, Nov. 1995.) (With the commercials I wonder how legal this operation is with the FCC? This is another example how national FM translator networks are going to screw up DXing. DB)

DYER, CONT. NEXT MONTH.....

SATELLITE NEWS

George W. Jensen
4604 Anntana Avenue
Baltimore MD 21206-4220

THE SMITH-CORONA IS OUT OF RIBBON. THERE HAS BEEN NO MAIL PICK-UP OR DELIVERY FOR OVER A WEEK AND I'M SNOBOUND. SO THIS IS BEING WRITTEN ON AN ANCIENT WORD-PROCESSOR AND WE'LL SEE WHAT HAPPENS.

GALAXY 3R AT 95 WEST IS NOW LAUNCHED, TESTED, AND IN USE. BELOW ARE SOME OF THE LATEST SERVICES TO APPEAR.

- 10 - SHOWTIME 2 - DELETE FROM T3-18
- 16 - HBO2 EAST - DELETE FROM G7-8
- 17 - CINEMAX 2 - DELETE FROM G1-23
